

**Amendments to the Specification:**

Please replace paragraph [0038], which begins at page 11, line 14, with the following rewritten paragraph:

[0038] Monitor 30 is a display device of cathode ray tube (CRT) or liquid crystal display (LCD) type, for example. As shown in Fig. 4, it includes an image output section for driving a deflection yoke or liquid crystals to output an image; a slot 32 for accommodating a memory card MC; an I/O terminal 33 for sending and receiving data via a cable CV; and a control unit 34 24 for controlling operation of the components of the monitor 30 on the basis of output device control information CI, described later.
